## Manager Comment

In May, the S&P 500 and Nasdaq Composite posted their best monthly performance since 2023 and recovered all their losses from the "Liberation Day" sell off to turn positive for the year. Most of this rebound comes as President Trump has reversed or paused some of his tariff policies or those policies have been challenged in court. The information technology and communication services sectors were the top performing sectors in the month with the Magnificent 7 doing some of the lifting. These names have been under pressure due to tariff uncertainty so it makes sense they would lift the most if tariff policy is reversed or toned down.

The Castlestone FAANG+ UCITS fund recorded a strong monthly performance in May. AI and chip related names were the fund's best performing holdings in the month led by Broadcom Inc. There were no changes to the FAANG's holdings in May.

## Fund Objective

The investment objective of the Sub-Fund is to generate capital growth mainly through exposure to the development, advancement and use of technology. The Sub-Fund will be invested predominantly in global technology equities some of which are familiarised by the acronym "FAANG" defining the most well-known technology equities. Apart from the FAANG equities, the Sub-Fund will also invest in other large technology stocks. However, The Sub-Fund may at any point in time deviate from allocating assets to the FAANG equities if this is deemed feasible in order to achieve the investment objective of the Sub-Fund. Up to 100% of the assets of the Sub-Fund may be invested in equities.
