Manager Comment

US stocks posted gains last month with the S&P 500 and Nasdaq closing out their best September his 2010. Seven of the eleven S&P sectors recorded gains in the month lead by technology as investors sought refuge in the "AI narrative" to hedge against short-term volatility related to political and interest rate uncertainty. Although the yield on the 2-year US Treasury note rose toward month end, the 2-, 10- and 30- year yields closed lower in the month. Precious metals extended their rapid advance, as economic data fueled expectations for lower interest rates and a weaker U.S. dollar, gold continues to trade at record highs. Oil prices were volatile in September but have been range bound since the start of August.

The Castlestone FAANG+ UCITS fund posted a gain in September, helped by the surge in artificial intelligence stocks. Intel Corp., helped by an infusion of capital from the US government, was the fund's top performer for the month. The technology sector appears to have a tailwind behind it as we head into the fourth quarter.

Fund Objective

The investment objective of the Sub-Fund is to generate capital growth mainly through exposure to the development, advancement and use of technology. The Sub-Fund will be invested predominantly in global technology equities some of which are familiarised by the acronym "FAANG" defining the most well-known technology equities. Apart from the FAANG equities, the Sub-Fund will also invest in other large technology stocks. However, The Sub-Fund may at any point in time deviate from allocating assets to the FAANG equities if this is deemed feasible in order to achieve the investment objective of the Sub-Fund. Up to 100% of the assets of the Sub-Fund may be invested in equities.
