## Manager Comment

U.S. equities experienced a "broadening" of market performance in January, with early gains driven by energy, materials, and industrials, while the Russell 2000 small-cap index outperformed the major indices. Monthly sector performance was led by energy with eight of the eleven S&P sectors in the green to start the year. The information technology sector saw increased monthly volatility as META Platforms and Apple recorded solid Q4 earnings beats, but Microsoft fell on AI spending estimates and Tesla dropped on a revenue miss.

Commodities were the month's top performing asset class, carried by the surge in precious metal prices. Crude oil and industrial metals also contributed positively to overall commodity performance. The US Dollar reached a four-year low in January and Bitcoin dropped sharply late in the month. Despite the volatility in the technology sector Castlestone FAANG+ UCITS funds posted a gain for the first month of the year. Performance was supported by better than 30% monthly gains in ASML Holdings and Samsung Electronics. No changes were made to the fund's holdings or weightings.

## Fund Objective

The investment objective of the Sub-Fund is to generate capital growth mainly through exposure to the development, advancement and use of technology. The Sub-Fund will be invested predominantly in global technology equities some of which are familiarised by the acronym "FAANG" defining the most well-known technology equities, Apart from the FAANG equities, the Sub-Fund will also invest in other large technology stocks. However, The Sub-Fund may at any point in time deviate from allocating assets to the FAANG equities if this is deemed feasible in order to achieve the investment objective of the Sub-Fund. Up to 100% of the assets of the Sub-Fund may be invested in equities.
